

Summit Forum on Transformation and Increasing Efficiency through “Enterprise Cloud”

“Made in China 2025” is the first 10-year action plan designed to transform China into a world manufacturing powerhouse and has been mentioned in the government reports for three consecutive years. Apart from “deepening implementation”, the works of this year emphasize to “expedite the application of big data, cloud computing and Internet of Things”. This releases an evident signal: to transfer the cloud computing from the virtual reality to real reality. Moving to the cloud is a big trend for the enterprise development in the future. The China Council for the Promotion of International Trade Foshan Committee works with Chinese top big data and cloud computing specialists to bring a summit forum on enterprise cloud-computing development, so as to help Foshan manufacturing industry to realize transformation and sharpen the brand of “Made in Foshan”.

Guests:

Mr. Wang Yuan Executive President of NetEase Hangzhou Research Institute and council member of Zhejiang Computer Federation.

How to realize cloud computing from the real reality to virtual reality, and how NetEase Cloud could help with enterprise transformation and upgrading?

Visible practical cases, touchable economic benefits and sharing practical cases, you couldn't afford to miss all of them.

Mr. Ling Zong, Senior Engineering/Scientist of IBM

Big data storage and analysis, artificial intelligent application, block chain technology and application deployment, cloud computing framework, service science, IoT application, IT service management, IT engineering project management, e-business engineering design, distributive industrial production real-time control and management.....He will explain all what you want to know about enterprise cloud-computing.

Mr. Bao Zhongtie Chief Evangelist of Talking Data, member of the Expert Panel of Big Data Industry Alliance, Tsinghua University and Zhongguancun Big Data Industry Alliance, member of the expert team of Chief Data Officer Alliance of China, and an initiator of big data implementation. How to realize big data? How big data improves actual production capacity and efficiency? What's real value of big data in production, sales and logistics and other sections? You couldn't afford to miss the unique interpretation by this evangelist.

Mr. Zhang Feng once was appointed as vice chairman and member of the CPC Committee of Zhejiang Provincial Science and Technology Association, and deputy director of Survey and Promotion Department of China Association for Science and Technology. Now, he acts as Vice Chief Editor of NetEase Media.

From email box to Yanxuan, Kaola, from game to intelligent manufacturing, from news app to cloud music, cloud classrooms..... What secrets does

NetEase have to frequently launch these apps, how NetEase assists the transformation of traditional manufacturing enterprises, and innovate Internet + ways. Don't miss this wonderful sharing opportunity.
